the home genius

YOUR HOME LIFE
ENHANCED BY
ARTIFICIAL INTELLIGENCE

Momo – The Home Genius

Your life enhanced by A.I.

Momo offers the first all-in-one Smart Home experience driven by Artificial Intelligence, integrated into a lamp.

Momo is a real “Home Genius”, learning and adapting to habits and requests, creating household scenarios to protect the home and its inhabitants, while saving energy and offering greater comfort.

ALL-IN-ONE SMART TECHNOLOGY

Designed and Made in Italy, Momo blends into the home. Thanks to its inbuilt technology Momo monitors the environment – camera, microphones, thermometer, gas and smoke detectors, motion detection and on-board sensors.

Gain greater
peace of Mind

LIVING IN INTELLIGENT HOMES, THE SIMPLE WAY

Simple and intuitive, Momo requires no installation, configuration, plug it in and forget it.

Interaction with Momo is extremely simple. You decide how. You can use voice or chats such as Messenger or Telegram, using natural language, or its App. You just make a wish: “Momo turn down the lighting”, “Momo let’s relax” or let Momo act independently as it learns.

More time to enjoy
your home life

ALREADY OWN SMART DEVICES? EVEN BETTER

Momo connects to Smart devices present on the market, such as Smart Thermostats, Smart Lamps and Smart TVs, and can interface with normal appliances, lighting and heating systems through simple adapters, combining their management to amplify the overall user experience.

Live simply
and conveniently

GREATER FREEDOM AND PEACE OF MIND

Protect your loved ones against the risks of intrusion.

Safeguard your home with early detection of gas, fire and water leaks.

Respond more rapidly to domestic incidents and emergencies.

Rest assured – multi-layered protection of privacy guaranteed.

MORE TIME TO ENJOY YOUR HOME LIFE

Gain productivity from optimized use of domestic appliances and home technology.

Free yourself from managing multiple technological devices.

Relax in a more comfortable environment – temperature, lighting, music and more – that reflects your lifestyle.

LIVE SIMPLY AND CONVENIENTLY

Optimize energy consumption and achieve measurable economies even in a short time.

Reduce energy waste – never again forget windows open, your lights on, or any other appliance on.

No knowledge of technology required. Forget installation, setup or configuration. Simply plug it in.

ELEGANT, DISCRETE AND FUNCTIONAL

Italian design and high quality materials make it an attractive addition to any living space.

Technology incorporated within a household lamp discretely blends into your home.

All-in-one design eliminates the need for multiple plastic-box technology with messy cables.

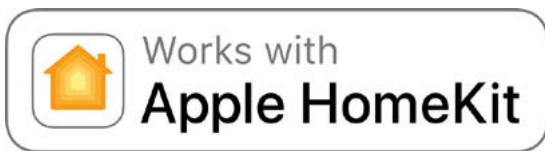

ALL-IN-ONE SMART HOME SOLUTION

Momo Technology

Timeline

Momo Partners

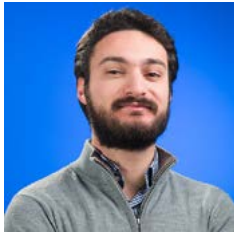

Momo is created by:

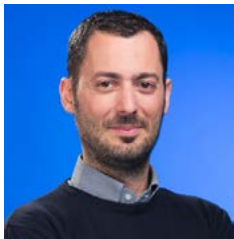

Edoardo Scarso - CEO

I.T. Engineer, team leader and Chief Executive Officer at Morpheos. He is the visionary in the Momo project.

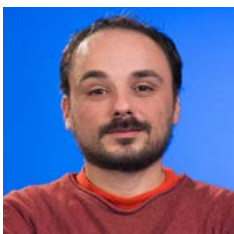

Davide Scarso - CIO

Chief Information Officer in Morpheos and System integrator for Momo. He focuses on Momo sensors and electronics components and ensures they all work together.

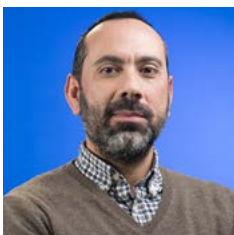

Nicola Picone - CTO

Chief Technology Officer, Nicola heads research, investigates and assesses the best technologies and devices on the market that can interface with Momo.

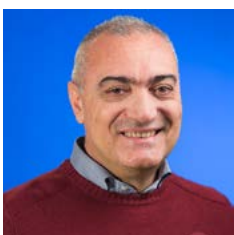

Luca Bonaccorsi - Senior Developer and R&D Manager

Head of Momo software development. With over ten years' experience in programming and coding for web-based applications and UI Architect, he is the Research and Development Manager in Morpheos.

Fabio Campione - Chief Executive Developer

Analyst, designer and hardware development manager. He coordinates electronic engineering and firmware development activities.

Bartolo Scarso - CFO

An engineer with over 30 years of experience in system and electronic equipment design for applications in I.T., electronics and mechanics. He is Chief Financial Officer at Morpheos.

Morpheus - Not simply a start up

Morpheus is an innovative startup in the ICT field, founded by a tight-knit team of I.T. and electronics engineers, designers and business managers.

We develop software, electronic devices and innovative services based that can have a social and cultural impact.

We set up Morpheos to bring together the critical know-how to deliver products and services.

We apply robotics to common interior design objects and artificial intelligence to web sites as our contribution to research and innovation that we believe can be self-sustaining and bring people closer to technology.

We have great faith in ingenuity and the ability of individuals to achieve their goals. Ours is widely accessible.
